Model Social Networking Policy for Schools

MODEL SOCIAL NETWORKING POLICY FOR SCHOOLS

This document sets out the policy of Marden Bridge Middle School on the use of social networking communication and aims to set clear expectations of professional behaviour when engaging in such activities.

Introduction

- 101 Social networking and its development have become in recent years an increasingly important feature of modern communication between individuals, as well as in terms of business and organisational communication. The expansion of such networks on the internet has transformed ways people interact and the school views this as a positive opportunity for closer communication with parents and other stakeholders within the community.
- 102 Though this technology brings with it new and exciting methods of communication, it also brings with it increasing risks relating to inappropriate usage. Therefore there are certain responsibilities, standards of behaviour and other organisational considerations which need to be considered. Participation online can result in comments being permanently available and open to being republished in other media.
- 103 It is therefore important that as a school we develop systems to safely embrace this technology when engaging with our stakeholders in the community as part of an effective communication strategy. It is therefore important that we balance activities to take into account legal requirements, the reputation of the school, our partners and ensure that any activities are within agreed principles.
- 104 This policy has therefore been developed to accompany the school's E – Learning Strategy as agreed by the Governing Body. As this latter strategy concentrates on the development of social media and networking within a Teaching & Learning related environment, this specific Social Networking Policy has been adopted to offer additional clarity in relation to personal usage both within and outside of school.

Defining social networking

- 201 For the purpose of this policy, social networking can be defined as¹:

“Web-based services that allow individuals to (1) construct a public or semi-public profile within a bounded system, (2) articulate a list of other users with whom they share a connection, and (3) view and traverse their list of connections and those made by others within the system.”

- 202 This definition is commonly used to include websites/blogs which allow people to interact with each other in some way – by sharing information, opinions, knowledge and interests. Examples evidenced by ACAS include:

¹ Boyd and Ellison: Journal of Computer Mediated Communication (2007)

- Facebook & Instagram – social networking services where users create personal profiles, add other users as friends and exchange messages and photographs.
- Snapchat – an image messaging app which allows users to share messages, videos and photo chat and messaging.
- Twitter – a micro-blogging service enabling its users to send and read publicly-visible messages called tweets and subscribe to other users' tweets.
- LinkedIn – a business-related social networking site mainly used for professional networking.

203 This list is not exhaustive and would include other web-based services such as blogs, message boards, photo document- and video-sharing websites and micro-blogging services.

Aims & Objectives

301 The purpose of this policy is to ensure that personal usage of social networking sites (even if operated on private spaces on such sites) promotes safer working practice and in doing so, minimise the risk of misplaced or malicious allegations made against workers within school. It will also act as a preventative measure in relation to workers who may consider misusing their position of trust and in doing so reduce the potential risk to the school (both legal and to its reputation) and to themselves.

302 In addition it will ensure clarity between information issued on behalf of the school by a worker (covered by the school E-Learning Strategy) and information released through general usage of social networking sites (both public and private spaces).

Scope

301 This document will be made available to all workers (as defined below) engaged in school who will then be expected to familiarise themselves with the principles covered within this policy. Where these principles are not adhered to then the school reserve the right to take appropriate action in the following manner:

- Where they are an employee - reference may be made to the school disciplinary policy and procedure to determine appropriate action.
- Where they are an agency worker - reference may be made to the agency for their withdrawal and a request made for the agency to consider its own procedures relating to conduct.
- Where they are acting under a “contract for service” - reference may

be made to the obligations within the relevant contract with the school.

302 This document does not replace or take priority over advice relating to other policies issued around safeguarding or IT security issues (email, ICT and data protection policies). It is intended to both supplement and complement any such documents.

303 This policy should also be read in conjunction with the schools e- strategy², together with the following school documentation:

- IT Security and Fair Usage Policy
- Equality Policy
- Safeguarding and Child Protection Policy Guidance
- Disciplinary Policy and Procedures
- Guidance on Cyberbullying
- Keeping Children Safe in Education Statutory Guidance
- Guidance relating to the School E-Learning Strategy
- Teacher Standards issued by the DfE³

304 Whilst every attempt has been made to cover a wide range of situations it is recognised that this policy cannot cover all eventualities. There may therefore be times when professional judgements are made and in such circumstances they will advise the Headteacher of the justification for any such actions. Headteachers will in turn seek advice from the School Link HR Business Partner where appropriate.

Responsibilities

401 Managers/Headteachers should:

- Ensure the document is communicated to workers in school, reminding them annually to familiarise themselves with its contents and links to other policies such as e-safety and child protection.
- Ensure a system is in place for regular monitoring and where necessary investigation of potential breaches of the policy.

² Schools have been provided with documentation from the school improvement team relating to resources needed to develop a school based E-Learning Strategy. Included in these resources available to school, for a limited period, will be the availability of an external E-Learning Strategy audit by the northern grid for learning.

³ Section 2 of these statutory standards for teachers relates to professional and personal conduct. These standards may apply to communication via social media.

402

Workers should:

- Ensure they become familiar with its contents and links, together policies such as e-safety and child protection.
- Ensure use of any social media is carried out in line with this and other relevant policies.
- Ensure they raise any queries or concerns they may have over social networking use and/or interpretation of the policy with their line manager at the earliest opportunity.

Principles

501

Though use of social networking sites not related to school-based activities does not require approval it is expected that workers covered by this policy will follow the following principles while engaged in such activities (whether engaged in public or private spaces on such sites) :

- Where it is intended to use social networking sites for an activity on behalf of school, workers should ensure they have received written approval from a member of the SMT prior to undertaking such activities.
- Communication between adults and pupils by whatever method should take place within clear and explicit professional boundaries as agreed by the school senior management team (e.g. the school based Learning Platform), conforming with the requirements of equalities legislation in such communications. Any digression from such boundaries should be reported to the line manager.
- Personal use of the internet, including access to social networking sites, will be permitted on designated school-based equipment (where available) either before or after work or during designated lunch periods. Non work-related access during work time is not permitted unless prior approval has been granted by a member of the SMT. Usage at all times must not involve any breach of copyright, or promote any financial, commercial, business, or political interests.
- All workers, particularly those new to the school setting, should review the social networking sites they participate in when joining the school, ensuring information available publicly about them is accurate and not inappropriate (e.g. photographs that may cause embarrassment to themselves and the school if they are published outside of the site).
- Confidentiality needs to be considered at all times through ensuring workers do not release any confidential information about themselves, the school, its employees, pupils, partners, or other stakeholders within the community.

- Assigning any school pupil as a ‘friend’ on their social networking page, or any former pupil up to the age of 18 is prohibited, and caution should be taken regarding becoming assigned as a ‘friend’ with children of school age on the roll of another school or ex-students especially where siblings continue to attend the school. In addition workers should never use, access, or become assigned as a “friend” of the social networking pages of pupils on the roll of the school, or former pupils under the age of 18⁴. If in doubt please seek advice from your Headteacher.
- Workers who comment upon policies relating to school should highlight their connection to the school, making it clear that comments are their own personal views/opinions and not representative of those of the school unless such comment has received prior written approval by a member of SMT.
- When using social media sites and not engaged in school business, workers should refrain from using work based e-mail contact address (such as .northtyneside.gov.uk or ntlp.gov.uk) or the school logo unless prior written approval has been granted by the school SMT.
- When commenting, uploading or posting links within social networking sites, remarks must never be derogatory, offensive, reflect negatively on your professionalism or that of colleagues or have the potential to bring the school into disrepute⁵. Where workers become aware of such remarks made by others on social media platforms they should refer these immediately to the Headteacher.
- There will be occasions when there are social contacts between pupils and staff, for example where the parent and teacher are part of the same social circle. However, these contacts will be easily recognised and should be made known to the Head Teacher where there may be implications for the adult and their position within the school setting.
- All workers have a responsibility to report any unsuitable material of a safeguarding nature uncovered relating to workers activities both on public and private spaces within a social networking site to the Headteacher, who will determine the appropriate action inclusive of reporting to external agencies.
- Workers should be aware of the effect their actions may have on

⁴ Note that there may be exceptions where a member of staff is required to access pupil social network pages but written approval must be obtained prior to access from a member of the SMT e.g. investigating pupil to pupil online cyberbullying. Where there are legitimate family links with a pupil/ex pupil the worker should inform the Headteacher in writing.

⁵ To limit risk to inadvertently releasing confidential information workers should give consideration to reviewing privacy settings within social medial networks and setting them to their highest levels to limit access and availability of information and comments.

their image, as well as that of the school. Information that workers publish/post may be in the public domain for many years.

601 **Cyber Bullying**

The Governing Body will not accept any form of bullying or harassment of or by workers engaged by the school, inclusive of that through social media⁶, commonly referred to as “cyber bullying”. This may include:

- maliciously spreading rumours, lies or gossip
- intimidating or aggressive behaviour
- offensive or threatening comments or content
- posting comments/photos designed to cause offence e.g. deliberately mocking an individual with the intent to harass or humiliate them

Any such action will be considered a breach of this policy and may result in disciplinary action. Workers who are experiencing cyber bullying should report the matter immediately to a member of the SMT or Headteacher⁷.

Other Breaches of Policy

701 Serious breaches of this policy by school employees could amount to gross misconduct and may result in dismissal. The below list constitutes examples of serious breaches but this list is not exhaustive:

- Breach of confidentiality/copyright
- Behaving in a discriminatory, bullying or harassing way towards others.
- Bringing the school or a partner agency into disrepute
- Where a criminal offence has taken place
- Unsuitable material that is of a safeguarding nature

Any member of staff who feels that a serious breach has occurred should inform a member of the Senior Management team (SMT) or the Headteacher.

Review of policy

801 Due to the ever changing nature of information and communication technologies the Governing Body of Marden Bridge Middle School have agreed to review this policy annually and if necessary, more frequently in response to any significant new developments.

Further Information

901 Information relating to a National Education Network e-safety audit tool for schools can be found at:

- [NEN E-safety Audit Tool](http://test3.e2bn.org/esafety/13/nen-e-) - <http://test3.e2bn.org/esafety/13/nen-e->

⁶ Cyber bullying may also take place via other means of electronic communication such as email, text or instant messaging.

⁷ Workers at any time may seek advice and support from their Trade Union/Professional association.
